

EFFICIENT AND SUSTAINABLE USE OF ENERGY IS AN URGENT NEED: BUILDINGS AND BUILDINGS CONSTRUCTION SECTORS COMBINED ARE RESPONSIBLE FOR 36% OF GLOBAL FINAL ENERGY CONSUMPTION AND NEARLY 40% OF TOTAL DIRECT AND INDIRECT CO2 EMISSIONS.

Eelectron is an Italian company that manufactures electronic devices, hardware and software on KNX and Bluetooth standard.

Its product range addresses building automation, hotel automation and home evolution sectors with a deep focus on complex environments management and experience in integrated solutions.

Eelectron's philosophy of comprehensive aesthetic design and engagement in developing highly innovative devices combines

with KNX interoperability and compliance with the most stringent international quality standards.

Eelectron's experience is at the user's service for demanding clients that require training activities, assistance on products and continuous development that focuses on emerging needs and applications, energy saving and achievement of simple and efficient solutions for the benefit of occupants and managers.

Today Eelectron is leading the market by following his roots and including new technologies.

Shareholder of KNX Association since 2005, Eelectron is an example of technological leadership in the application of the common European standard protocol.

Eelectron SpA is a KNX certified training center:
accredited by the KNX Association for the
organization of basic, advanced and
HVAC courses.

The EIB/KNX technology standard is now the most widely used in the field of control for buildings with service and residential uses, covering more than 10,000 devices produced by some 130 leading manufacturers in electronics / devices, and more than 12 million nodes installed worldwide.

KNX is approved by:

- European Standard (CENELEC EN 50090, CEN EN CEN 13321-1 and EN 1332-2 “KNXnet / IP”)
- International Standard (ISO / IEC 14543-3)
- Chinese Standard (GB / Z 20965)
- U.S. Standard (ANSI / ASHRAE 135)

It allows to combine **Comfort** and **Savings**, with long term investment protection, freedom of service provision and constant **Technology Evolution**.

Thanks to the **KNX standard** technology, various integrations are available on the system; therefore, together with Eelectron's know-how, various technical requirements can be addressed.

KNX flexibility offers the possibility to add or reprogram new devices after installation and meets the needs of completion in **renovations or extensions**.

www.knx.org

BUILDING EVOLUTION

Automate functions of medium-large buildings: commercial, offices, hospitals, hotels, museums, public buildings | Offer **automatic management and guarantee continuous integrated control**, lowering energy costs and improving efficiency | Increase comfort and safety of the occupants and improve quality of life.

Reducing energy consumption not only lowers costs, but also **reduces the environmental impact of the building for the benefit of all.**

INTEGRATION

BRIGHTNESS
CONTROL

CONSTANT
DIMMING

PRESENCE
DETECTION

HVAC
CONTROL

BLINDS AND
SHADES CONTROL

More comfort, higher energy efficiency, scalability, security and a better quality of life.

Optimizing energy efficiency in buildings means then use the energy only in the required amount and only when necessary, thanks for example to:

- ✓ Integrated control
simple and efficient supervision and control software
- ✓ Lighting and HVAC control, presence and Illuminance related
 - lighting control based on the presence of users
 - HVAC control based on the presence of users
 - dimming of lights based on natural brightness
 - groups of lights management
- ✓ HCL (Human Centric Lighting)
implementation of logics to manage the temperature (hot / cold) of the light, changing the color according to the time of day and the natural temperature - for the maximum benefit of the guests
- ✓ Environmental parameters detection
 - enhanced automatic shading control based on sun position tracking/season
 - CO₂ / V.O.C. detection and management of air recirculation
 - humidity and sound detection for environmental optimization
- ✓ Integration in third party BMS

HUMAN CENTRIC LIGHTING

AIR QUALITY

ENERGY CONSUMPTION MONITORING

CONFIGURABLE SMART LOGICS

SUPERVISION

REMOTE CONTROL

MULTI.SENSOR KNX

DESIGN **PLUS**
 powered by **light+building**
 2020

INNOVATIVE, SMART, RELIABLE

The new range of sensors, combining information on presence, brightness, humidity, temperature and sound, contribute effectively to control heating, cooling, lighting, shading and room optimization complying with Leed®, Breeam® and Well® requirements for buildings.

ELEGANT FLAT DESIGN

Top functionality combined with design

installazione flessibile

Ceiling installation. Stability granted by the spring clips, hidden by the ceiling mounting.

Flush-mounted with Box mounting frame.

Surface installation with the surface mounting enclosure.

LIGHTING COMFORT CLOSER TO REALITY

thanks to the "Circadian Rhythm" logic with which brightness and color temperature are imposed on the basis of predefined curves or on the real position of the sun during the day with respect to a terrestrial coordinate.

Human Centric Lighting is a lighting concept based on color variation, light intensity and proper lighting that mimics the natural daylight to enhance comfort, health, wellbeing and human performance.

Multi.Sensor directly provides HCL control in different formats according to the controlled device.

Plug-in for air quality

Accessories that extend the features of the Multi.Sensor range to monitor the air quality inside buildings, with particular with regard to the wellness and comfort of the building occupants.

SM03A01ACC
Temperature sensor
CO₂ sensor

SM03A02ACC
Temperature sensor and
a VOC sensor to measure
indoor air quality (IAQ) and
CO₂ equivalent (eCO₂)

wide detection area

thanks to the sound sensor it is the ideal solution for rooms with parts not totally visible to the infrared sensor.

optimized for small movements

9025 MULTI.SENSOR CONTROLLER

EFFICIENT, PRECISE, ELEGANT

9025 Multi.Sensor Controller is a device of the **9025** series, wall-mounted; it monitors the internal environment and allows to detect temperature, humidity and CO₂ (measured directly by means of an integrated probe, not through calculations based on other sensors).

It allows the optimization of values whilst keeping energy consumption to a minimum and therefore delivering of a **healthy and efficient environment to occupants**, making the building more sustainable.

MC06A01KNX

9025 Multisensor Controller [CO₂ – Humidity – Temperature]

HC06A01KNX

9025 Humidity – Temperature Controller

device includes 6 capacitive buttons that can be configured to manage on/off commands, dimming, shutters and venetians control, scene recall and control, objects sequences etc..

CUSTOM DESIGN

ON REQUEST

Products and solutions, natively designed for a CUSTOM DESIGN.

A world of materials, finishes, icons to optimize and personalize the experience of people and requests in different realities.

Eelectron provides to architects and interior designer a co-design service to achieve seamless integration levels.

WELNESS, ENERGY EFFICIENCY, SUSTAINABILITY

ROOM AUTOMATION

Universal Comfort Controller 0-10 V KNX

An interoperable controller for room automation.

It covers modern needs for FCU applications with 0-10V actuators and variable speeds.

Outputs

- 3 x 16A Relays
- 3 x 0-10V (1 can be Analog Input)

Inputs

- 1 x 0-10V o 4-20mA
- 5 x Digital Inputs (2 can be NTC probe)

The TC57A01KNX device is a DIN rail EIB / KNX actuator for fan coil units control.

Una soluzione flessibile: ogni I/Os può essere programmato per differenti funzioni (es.controllo luci)

- Easy to program
- Flexible range of applications: HVAC, LIGHTS, SHUTTERS
- Advanced logics

Examples of APPLICATIONS:

- 0-10V variable speeds
- 2 x 0-10V Valves
- NTC temperature probes

Esempi di APPLICAZIONI:

- 0-10V velocità variabili
- 2 x 0-10V Valvole
- Sonde di temperatura NTC

OTOMO

OTOMO

OPTIMIZED OFFICE AUTOMATION

OTOMO® is a system composed of electronic devices and objects (table and ceiling lamp) equipped with environmental sensors.

It works by DETECTING THE PRESENCE OF A USER IN AN ENVIRONMENT and consequently managing lights, energy saving, environmental parameters.

OTOMO® is an innovative system designed to optimize a single target: the office.

It uses Bluetooth® technology allowing objects to exchange information over a wireless network that is entirely configured through the App, available for smartphone & tablet.

DALI

LIGHTING / CONSTANT DIMMING

BLINDS/SHADES

GATES

SHUTTERS

AUTOMATIC MANAGEMENT AND / OR RELATED TO THE PRESENCE OF THE USER

- lux metering
- control and constant brightness dimming through lux meters installed on the work table / ceiling
- energy savings thanks to shading control
- activation of “favorite” settings for single user / environment
- automatic zones shutdown

OTOMO

It's a network of Bluetooth® controls born to manage optimization, energy saving and office control through smartphone and mobile devices.

Through the **detection of qualified presence** and thanks to the integration of **Bluetooth Low Energy®** and **IoT** sensors, OTOMO allows - with a wireless solution - to improve the well-being of the occupants and the environmental quality.

OTOMO® stands out in the market with a professional proposal: easy to install, scalable and affordable, it requires minimum programming skills for its setup, providing a new relationship between simplicity and efficiency.

OTOMO® can be integrated with 

A simplified set of well centred components:

- table lamp with lux/temp metering
- DALI Bluetooth Low Energy® controller
- relè Bluetooth Low Energy® modules
- switch Bluetooth Low Energy® interface module
- lux / temperature meter accessory
- lighting fixtures **OTOMO® enabled**
- **gateway:** OTOMO-KNX | OTOMO-IP-ModBus
- beacons for user detection

SUPERVISION ENVIRONMENT

HORIZONE

For intelligent buildings

Compatible with SmartPhone and Tablet iOS® or Android®, PC & Laptop

MacOS / Windows OS

HORIZONE, available in different sizes, is the perfect solution either for small environments, like professional studios, shops, showrooms, and for extended applications in commercial malls, office buildings, sport complexes, hospitals.

Dedicated centralised monitoring functions are also available for multi-facility corporations, as for shops or delocalised manufacturing sites.

r, the system is not requiring any working PC in the installation.

HORIZONE allows users with many possibilities to create scenarios, astronomical clocks, logics, comparators, data logging, graphs, email notifications for alarm reporting for real-time management and monitoring of the system and advanced controls with simplicity.

La robustezza dell'hardware e la qualità costruttiva lo rendono il prodotto ideale per applicazioni che presentano elevati requisiti in termini di affidabilità, stabilità e resistenza a disturbi ed interferenze.

Il sistema offre compatibilità nativa, senza necessità di interfacce esterne, con il protocollo ModBus: permette il dialogo con **strumenti di misura, centraline di controllo, sensori ed altri dispositivi** già operativi nella struttura, consentendo l'integrazione nelle pagine grafiche di **valori, stati e comandi** da e verso questi sottosistemi.

HOTEL SOLUTION

Hospitality industry is a complex environment with a particular attention to:

- exceptional guest experience through Usability, Comfort & Design
- delivery of a quality service through Profitable Operational Efficiency and Integration
- request for competitive, reliable and scalable solutions for operators, protecting investment in the medium-long term period

Unique experience for guests & staff

Hospitality industry is a complex environment with a particular attitude and attention to:

- ✓ Exceptional guest experience through Usability, Comfort & Design.
- ✓ Delivery of a quality service through profitable operational efficiency and integration.

With **over 20 YEARS of EXPERIENCE** and everyday learning from hotel operators and managers, **MORE THAN 36.000 ROOMS** installed in **80 COUNTRIES WORLDWIDE**, important references and a solid range of products, we are recognized as one of the leader in the **KNX HOTEL MARKET**, through constant development of solutions and high experience on project, advising always the best to our customers.

Deploying a wide spectrum of dedicated solutions, Eelectron is assuring considerable energy savings through an intelligent management of lighting, heating and cooling systems, delivering fast returns on investments and flawless project execution.

With a focused eye on contemporary design, customization techniques and material research we constantly follow owner's and operators highest standards.

OCCUPANCY DETECTION

Transparent control, evident comfort

Accurate presence information thanks to integration with door magnetic sensor.

Our occupancy detection solution can understand guest presence in the room by using a DEDICATED PRESENCE SENSOR. It detects also unexpected presence in the room and is able to differentiate multiple behaviours.

When the room is occupied, the Guest will have full control of all room lighting and temperature controls.

The system is able to detect presence also from other bus events.

When the room is 'unoccupied', all lights will turn off (with a standard delay) and the HVAC system will reset to the preferred temperature. If the room is unsold, all lights will go off and the HVAC will reset to a convenient temperature.

INTEGRATION & SCALABILITY

Shaking hands with professional subsystems

GRMS - Guest Room Management System can be integrated with the BMS and PMS in order to enable global management of the building and the hotel's operations to help reduce running costs and increase the efficiency of the building.

- ✓ Compatible with Property Management Systems (MICROS Fidelio Opera®, Protel, Flyhotel ...)
- ✓ ModBus integration to the most widely used brands and technologies (LON e BACnet, Mitsubishi®, Daikin®, Toshiba®, Sanyo®...)

HORIZONE

ACCESS CONTROL & SUPERVISION

Energy saving and cost control

- ✓ Presence Detection
- ✓ Guest Management
- ✓ Staff Management
- ✓ Profile Management with preferred HVAC and Lightning settings
- ✓ Zone Control
- ✓ Access Reports
- ✓ Presence-Activated Logics

A Complete view on the entire building, common areas, alarms client's and staff activity locally or from remote.

Using the **Virtual Badge app** it is also possible to manage doors opening/access and the control of the room directly via the customer's mobile device.

PROTECTION & SECURITY

Highest standards ever, as a must

KNX is the **MOST SECURE** smart home and smart building standard available, matching **highest security requirements** in cyber security by following **AES128 Standard**.

Full secured KNX installations are guaranteed both from attacks carried out remotely, and from the risk of possible tampering of the bus system aimed at stealing informations or sending unwanted commands: without having the necessary cryptographic keys, it is not possible to decrypt and replicate data traffic.

Our solutions are KNX SECURE Ready.

A safe energy management is granted also through redundant power supplies which reduce loads peaks and react to unexpected failures.

CUSTOMIZATION

Your style

Products and Solutions, natively engineered for CUSTOM DESIGN.

A World of materials, finishings, icons to optimize guest's experience and hotel's brand identity.

Products dedicated to the hospitality industry that meet customer needs without sacrificing the quality of industrial standards.

9025GL02E03
Doorpanel 2 ch
Black/white + RGB

9025GL10C01
9025 Custom Bedside Panel

9025 Door Panel for guest / service signaling which includes an RGB bar for MUR/DND function display. Backlit led number of the room or logo could be customized following the hotel needs. A dedicated thermostat and/or temperature probe is embedded in the product in order to optimize the functionalities on common areas..

9025 Bedside Panel includes the features of the highly acclaimed switch: up to 10 channels, thermostat or temperature probe integrated, 1 analog / digital input on board. The product is intended to fulfill the request of the hotel market including high possibility of customization through dedicated icons set, two sockets and a minimal design.

Both products integrate the **Virtual Holder Logic** featured in 9025 switches and thermostats range

RESIDENTIAL SOLUTION

Automate the functions of a residential building to offer **comfort, safety and simplicity**, future-oriented, to maintain **commercial attractiveness over time**, contribute to **environmental sustainability** and better **enjoy your home**.

LIGHTING

control of the indoor and outdoor lighting.

BLINDS & SHADES CONTROL

The control of blinds & shades is performed centrally or decentralized

RISCALDAMENTO, RAFFRESCAMENTO, CONDIZIONAMENTO

Controllo centralizzato e/o manuale
- anche remoto - per garantire la temperatura desiderata e un consumo consapevole

CUSTOMIZED SCENARIOS

To accommodate the different needs of environments and users

Benefits of a smart home

Compatibility, comfort and safety.

Eelectron products offer a solution that meets the highest standards in residential buildings combining comfort and safety with savings and environmental awareness.

Eelectron's automation solutions for the residential sector are aimed at medium-large sized residential buildings and luxury properties: compatible with almost all electrical devices and with third-party products. This integration ensures system scalability and can meet future needs

- ✓ Control and management of underfloor heating / cooling / room humidity
- ✓ DALI / DMX / Led lighting control
- ✓ Local or remote control from Tablet and smartphone (Android - iOS)
- ✓ Interface with audio systems, security systems, IP cameras
- ✓ Interfacing with video door entry systems

MONITORING/ALARMS

Sensors for monitoring windows and doors, control systems and alarms

VISUALIZATION AND REMOTE CONTROL

Visualization and central home operation using touch displays. also on the move from smart phones and tablets

ENERGY METERING

Transparent consumption and real-time control

SUPERVISION

HORIZONE

Home automation

HORIZONE is the ideal solution to manage every technological sub-systems for home evolution: lighting, blinds/shadows, temperature, loads control, power consumptions, door intercom system, irrigation system, security cameras, alarm system, music/video.

HORIZONE has been designed to deliver full control in an installation with one only tool. Easy access from Pc/Mac or mobile devices, from your house or from remote.

Built over a reliable and powerful software architecture, HORIZONE allows users with many possibilities to create scenarios, logics, and advanced controls with simplicity.

- ✓ Direct KNX and Modbus standard communication
- ✓ Local or remote configuration and control from Pc/Mac, smartphone or tablet, through web browser (Safari, Google Chrome etc.) or with an Apple or Android free app
- ✓ Fast configuration: ETS project direct import function (KNX installation)
- ✓ Voice control

MODULAR SOLUTIONS

Actuator for Electrothermal Valves

A typical use of the device is underfloor heating of residential installations focused on comfort and energy saving.

HA04A01KNX
Actuator for Electrothermal Valves
4 IN / 4 OUT

Control of 24Vac or 230Vac valves with no relay sound
Inputs (from 1 to 4) can be used as digital or analog
up to 8 smart thermostats

HA08A01KNX
Actuator for Electrothermal Valves
8 IN / 8 OUT

Freely configurable logics (up to 7)
4 or 8 Channels for valves in PWM (Solenoid Actuators)
2 or 4 channels for 3 point valve control
