Imagine, with one slight touch, the room dims to the right scene, music starts playing, the temperature rises and the curtains close. Ready for a cosy evening. The integration of all these functions in an intelligent and user-friendly system is Basalte Home, the future of the modern home.

The minimalist look of our products and the use of high-grade materials and finishes result in a timeless design for the intelligent home.

YOUR HOME, ONE APP

An elegant touch screen and an intuitive app on your tablet or smartphone let you control all home technology.

Lights, shades, climate as well as security are clearly displayed. Music is part of every room and a simple tap starts your favourite Spotify playlist.

Lights & shades

Set the scene

We believe lighting control should be simple, intuitive and easily accessible.

With Basalte Home, you can create comfort scenes, to automate frequent actions for common situations like 'Morning', 'Relaxing', 'Away' etc.

With just one tap on the app or a touch on our design switches, a scene automatically sets your lights and shades to a specific setting.
